

TERRATECK DOUBLE WHEEL HOE WITH BIO- DISCS

- Double wheel hoe - approx 335\$ USD
- Bio-disc attachment - approx 182\$ USD
- USD and weighs 7lbs 4oz
- Sold at Johnny's seeds in the US, Dubois.ag in Canada

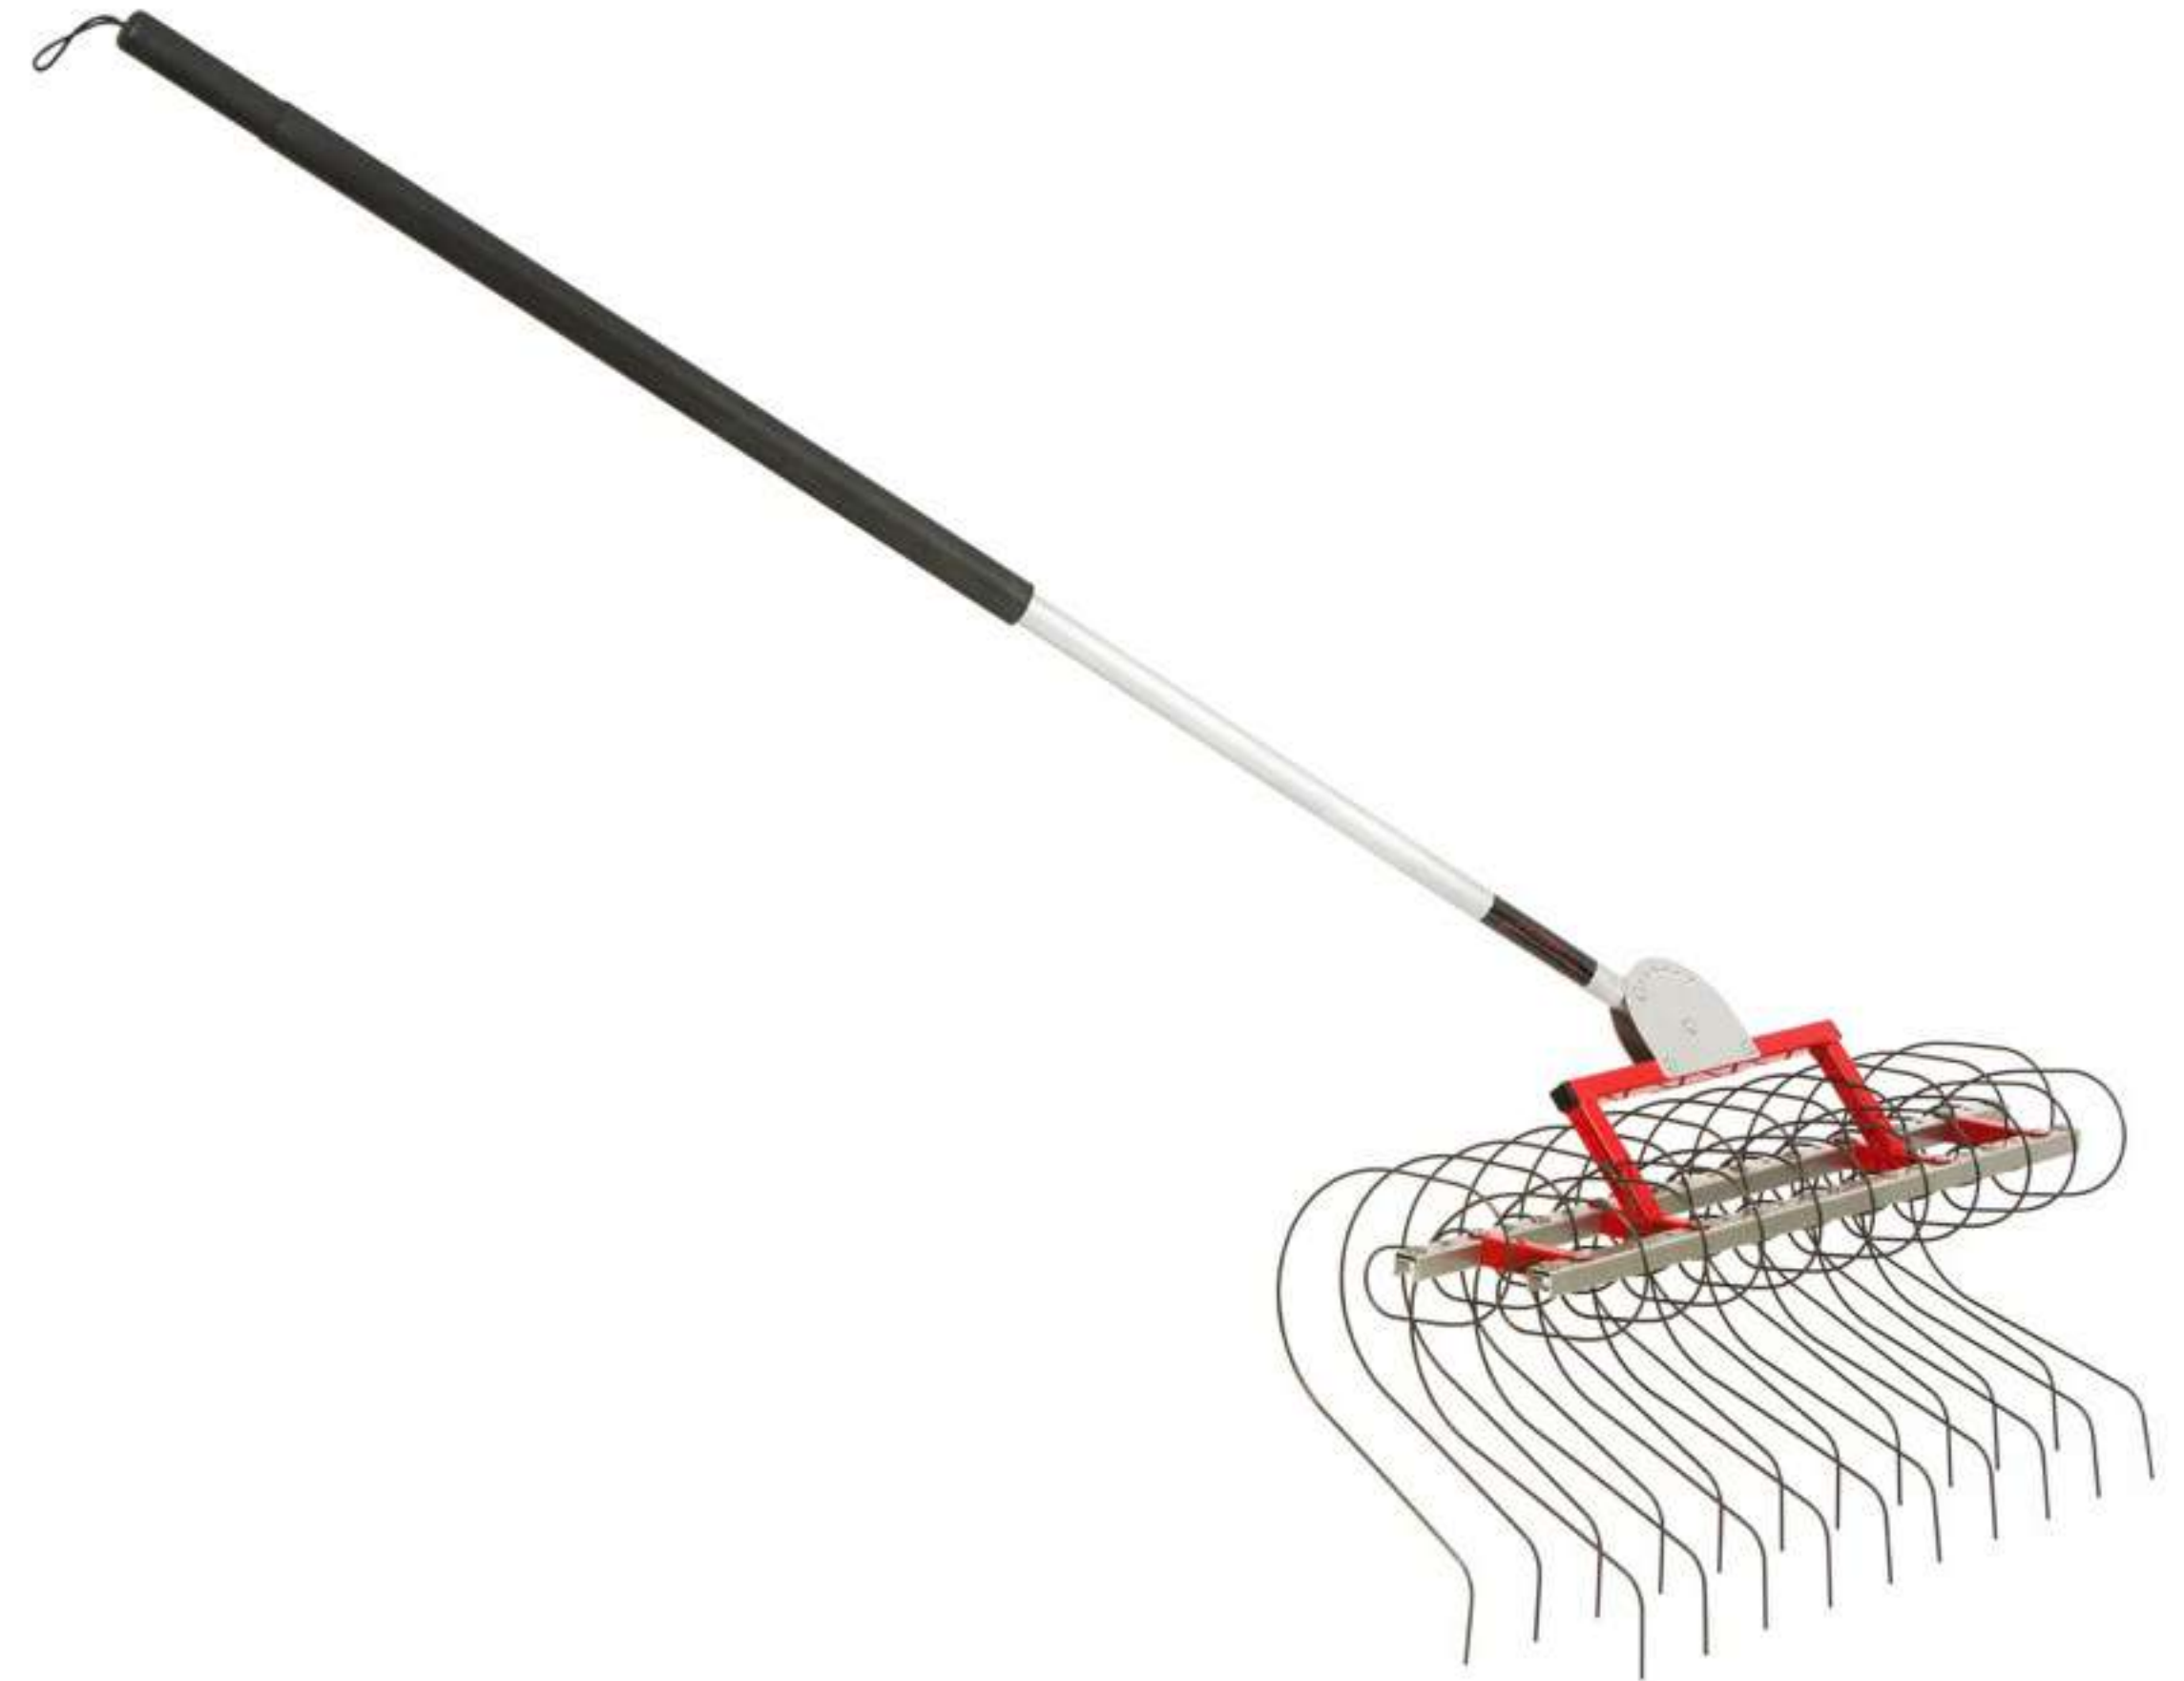

FLEX-TIME WEEDER FROM TWO BAD CATS LLC

- Scratches the surface and destroy small emerging weeds
- Bounces away from the sturdier established crops
- Young seedling that are well rooted will survive, smaller weeds won't!
- Covers 30 inch bed in one or two passes

FLEX-TIME WEEDER FROM TWO BAD CATS LLC

- Light and and effective tool that allows for blind weeding of beds while weeds are at the white-thread stage
- 30-inch version costs 259\$ USD and weighs 7lbs 4oz
- Sold by Two Bad Cats LLC and Sold at Dubois.ag in Canada

Weeding Schedule

A	B	C	D	E	F	G	H
	Stale seedbed	Flame weed	Flex tine 1	Flex tine 2	Bio-disks	Stirrup hoe	Handweed
Beets					12 days after transplant	19 days after transplant	
Carrots	one week before seeding	5 days after seeding			21 days after seeding		28 days after seeding
Radishes, Hakurei turnips, Arugula, Mustard, Kale			10 days after seeding	17 days after seeding			
Fennel, Coriander, Dill, Green onions, Kohlrabi			10 days after transplant		17 days after transplant (fennel and green onions)	17 days after transplant (dill, coriander, kohlrabi)	
Lettuce, Romaine, Rapini, Pac Choy						12 days after transplant	

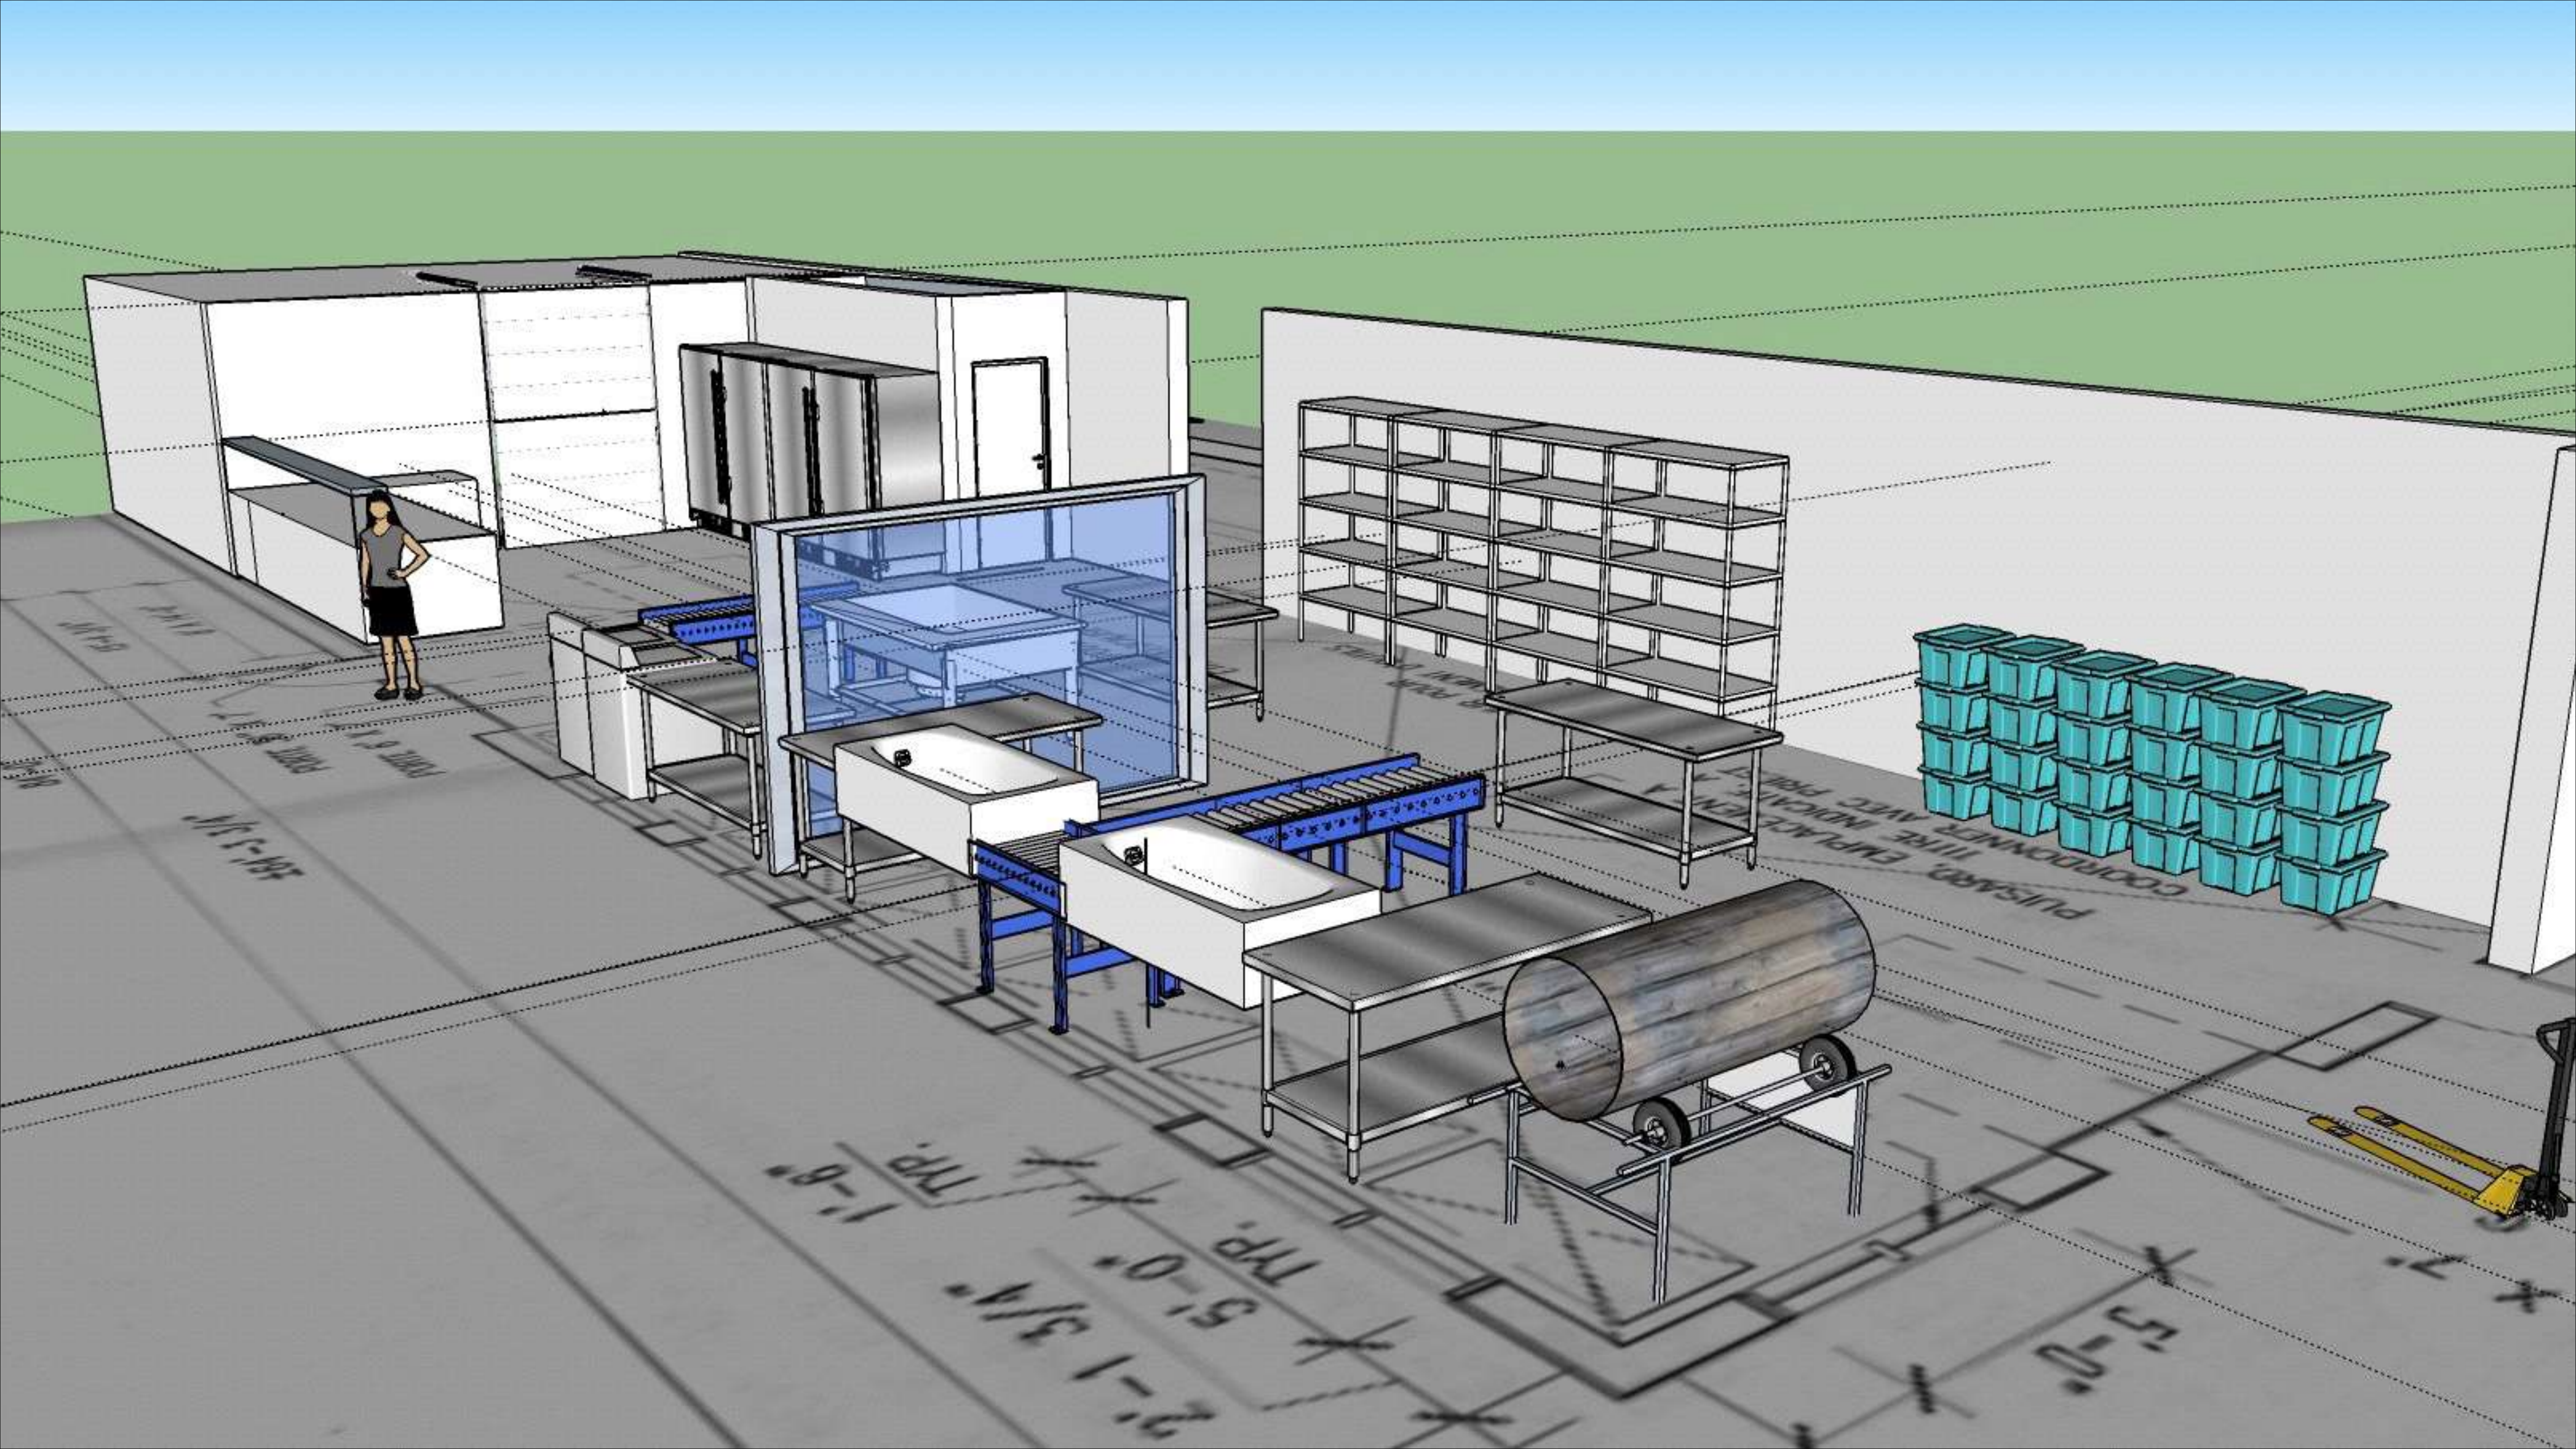

THIS IS OUR LIFE!

Too often farms don't feel like they have time and money to set up a really good wash station. But that the typical mix fresh vegetable farm spends 50% or more of their labor on harvesting and washing. The reality is that farms can't afford NOT to pay attention to their wash station set-up.

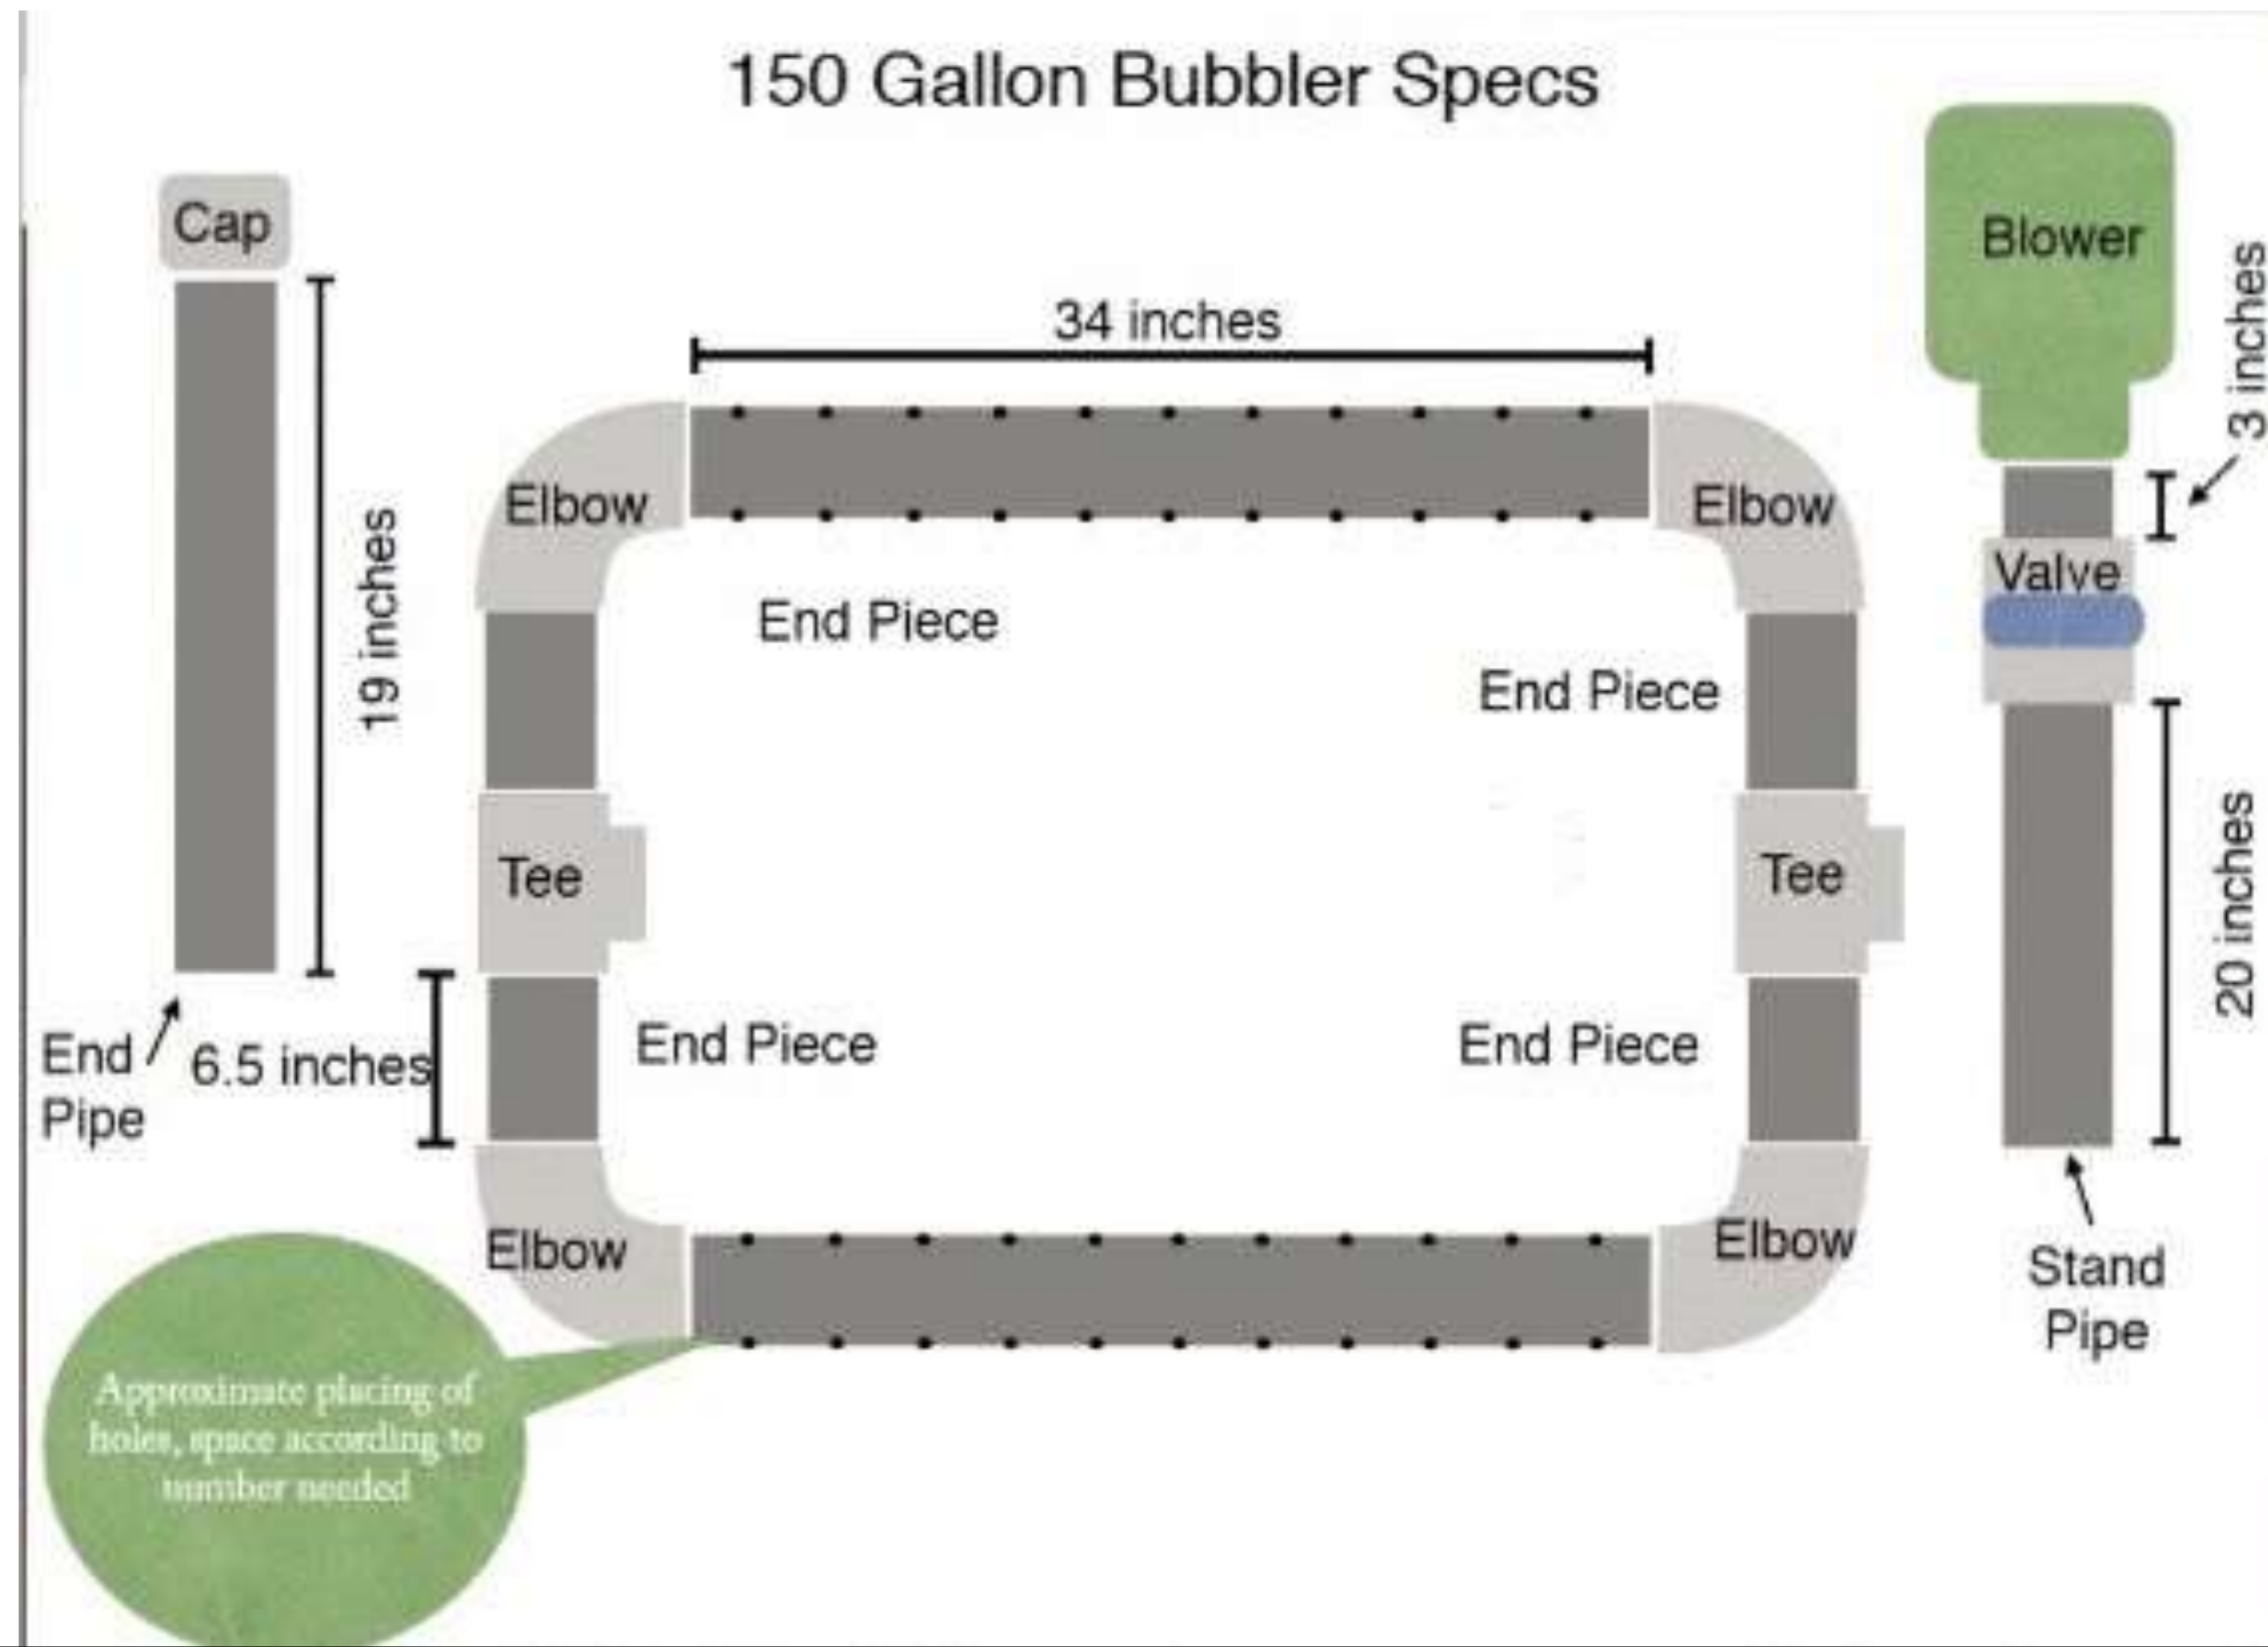

THE "BUBBLER" JACUZZI AIR CIRCULATION SYSTEM

- Single washing process (instead of a double or triple wash)
- Streamlines our process, allowing us to wash, dry and bag up 100 pounds per hour
- DIY tutorial of the design created by Michael Kilpatrick

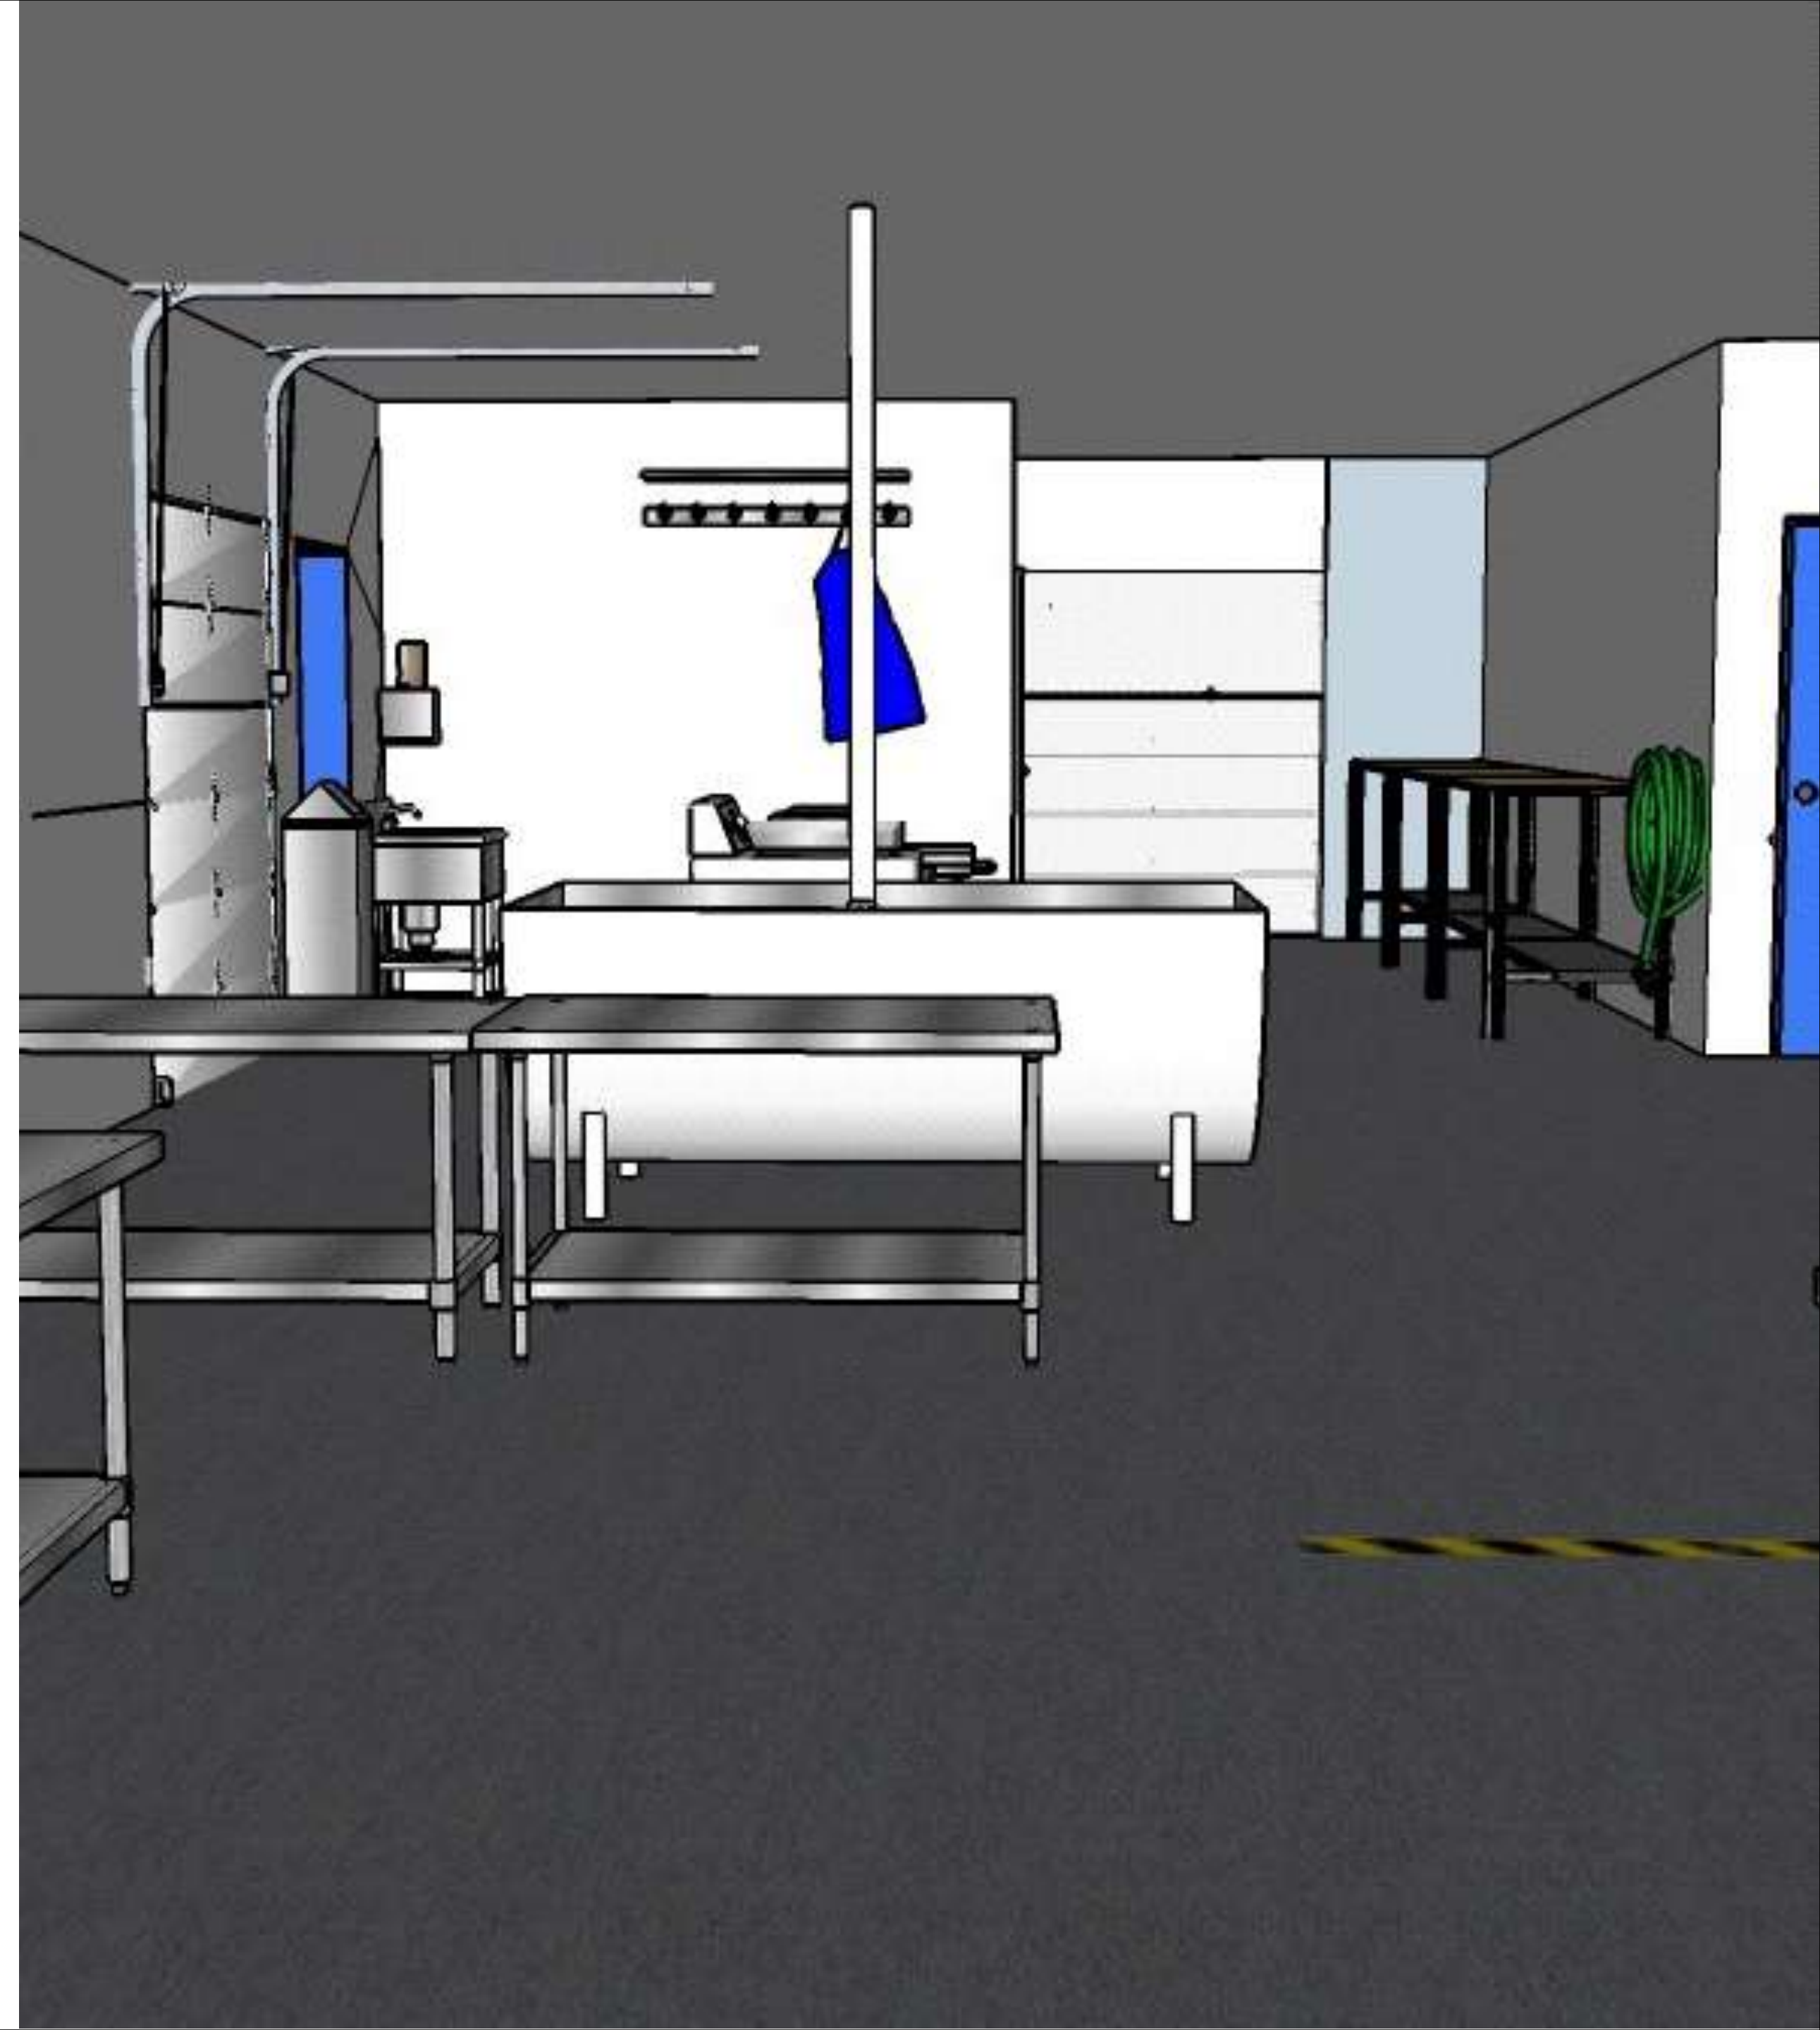

a Jacuzzi water pump moves water through 2-inch PVC pipe to create gentle washing action in the "Bubbler."

GREENS BUBBLER

- Modification of a stainless steel tub with perforated PVC pipes, attached to a jacuzzi pump, that allows for quick and effective washing of greens
- Stainless steel tub - available used from 500+\$
- Other DIY modifications cost approx 350\$
- Full tutorial available on Michael Kilpatrick's website

WASHING MACHINES TO DRY GREENS

- At 800 rpm its the BEST solution by a mile. Cheap and it works. BUT ...
- The washing machines is not compliant with food safety standards

SUCKS! AND
ARE \$\$\$\$

Online tutorial
available on Michael
Kilpatrick's website

FLOAT VALVES ON A WASH TUB

- Other duties can be done while it is filling without risk of overflowing
- Hudson valves cost around 30\$

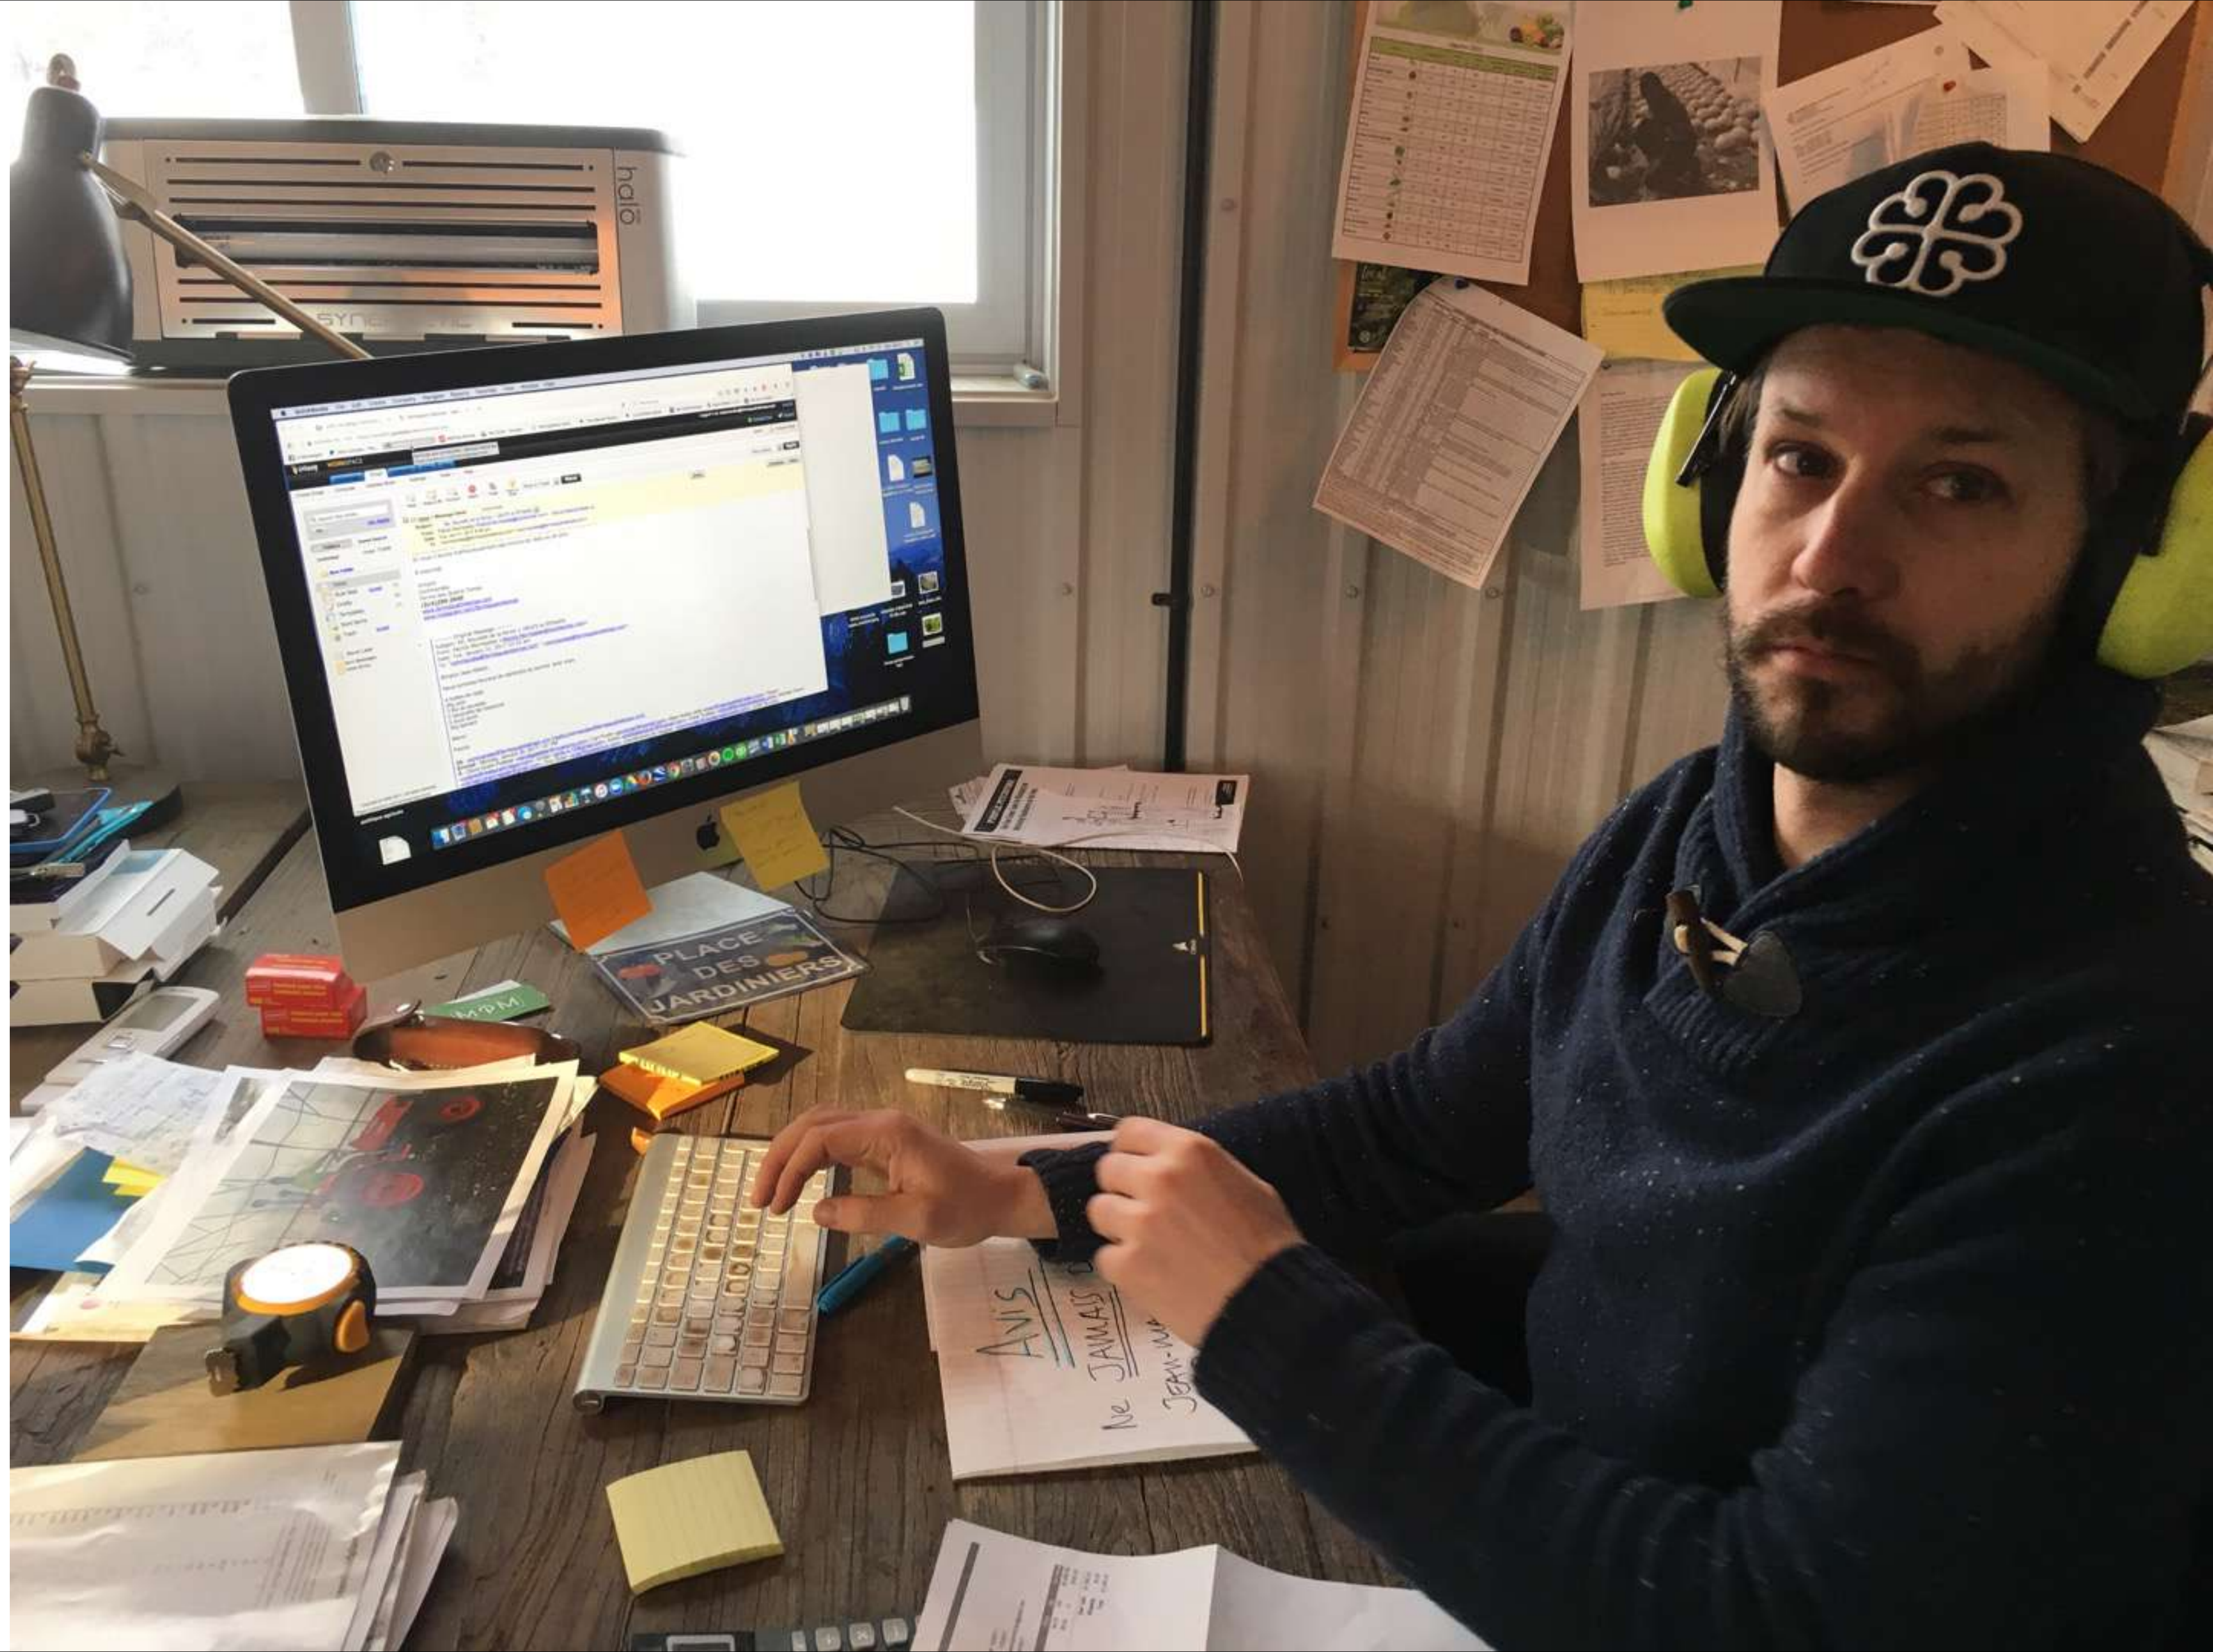

CROP PLANNING 2.0

*"IF I HAD FOUR HOURS
TO CHOP DOWN A
TREE, I'D SPEND THE
FIRST TWO HOURS
SHARPENING THE
AXE."*

-ABRAHAM LINCOLN

CROP PLANNING STEPS

1. Setting financial objectives
2. Determining production
3. Making a garden plan
4. Revisiting production plan
5. Establishing a crop calendar

Production Calculation

Vegetable	Days to maturity*	Yield/100-foot bed**	Notes
Arugula	35	200 bunches	
Asian greens	60	300 units	
Basil	60	150 units/week	Assume 1 bunch (0.4 oz.) per plant every 2 weeks once production is underway.
Bean	55	65 lb./week	Assume 130 lb. total over 2 weeks of good production.
Beet	60	160 bunches	
Broccoli	75	120 heads	
Bulk spinach	40	75 pounds	Assume 35 lb. at the first harvest and 40 lb. between the second and third harvests.
Cabbage	80	150 units	
Carrot	55	180 bunches	
Cauliflower	75	130 heads	Allow many more days in the garden for certain cultivars.
Celery root	140	300 units	
Eggplant	100	65 units/week	Assume about 1 fruit per plant per week once production is underway.
Fennel	80	400 units	
Garlic	N/A	600 units	
Green onion	75	350 units	
Greenhouse cucumber	50	115 units/week	Assume 1.75 fruits per plant per week.
Ground cherry	110	Undetermined	2 beds are enough for our annual needs.
Kohlrabi	60	420 units	Allow many more days in the garden for certain cultivars.
Lettuce	50	250 units	
Melon	80	100 units or less	Assume 1.25 fruits per plant.
Onion	120	400 lb.	
Pepper	120	120 units/week	Assume about 1 fruit per plant per week once production is underway.
Radish	30	300 bunches	
Snow/snap peas	55	25 lb./week or less	Assume 75 lb. total spread out over 3 weeks of good production.
Summer squash	50	100 units/week	Assume 2 fruits per plant per week.
Swiss chard and kale	60	150 units/week	Assume 1 bunch per 2 plants every 2 weeks.
Tomato	120	150 lb./week	Assume 3 fruits per plant per week once production is underway.
Turnip	40	200 bunches	
Summer leek	120	175 units	These are sold in bunches of 3 or 4.

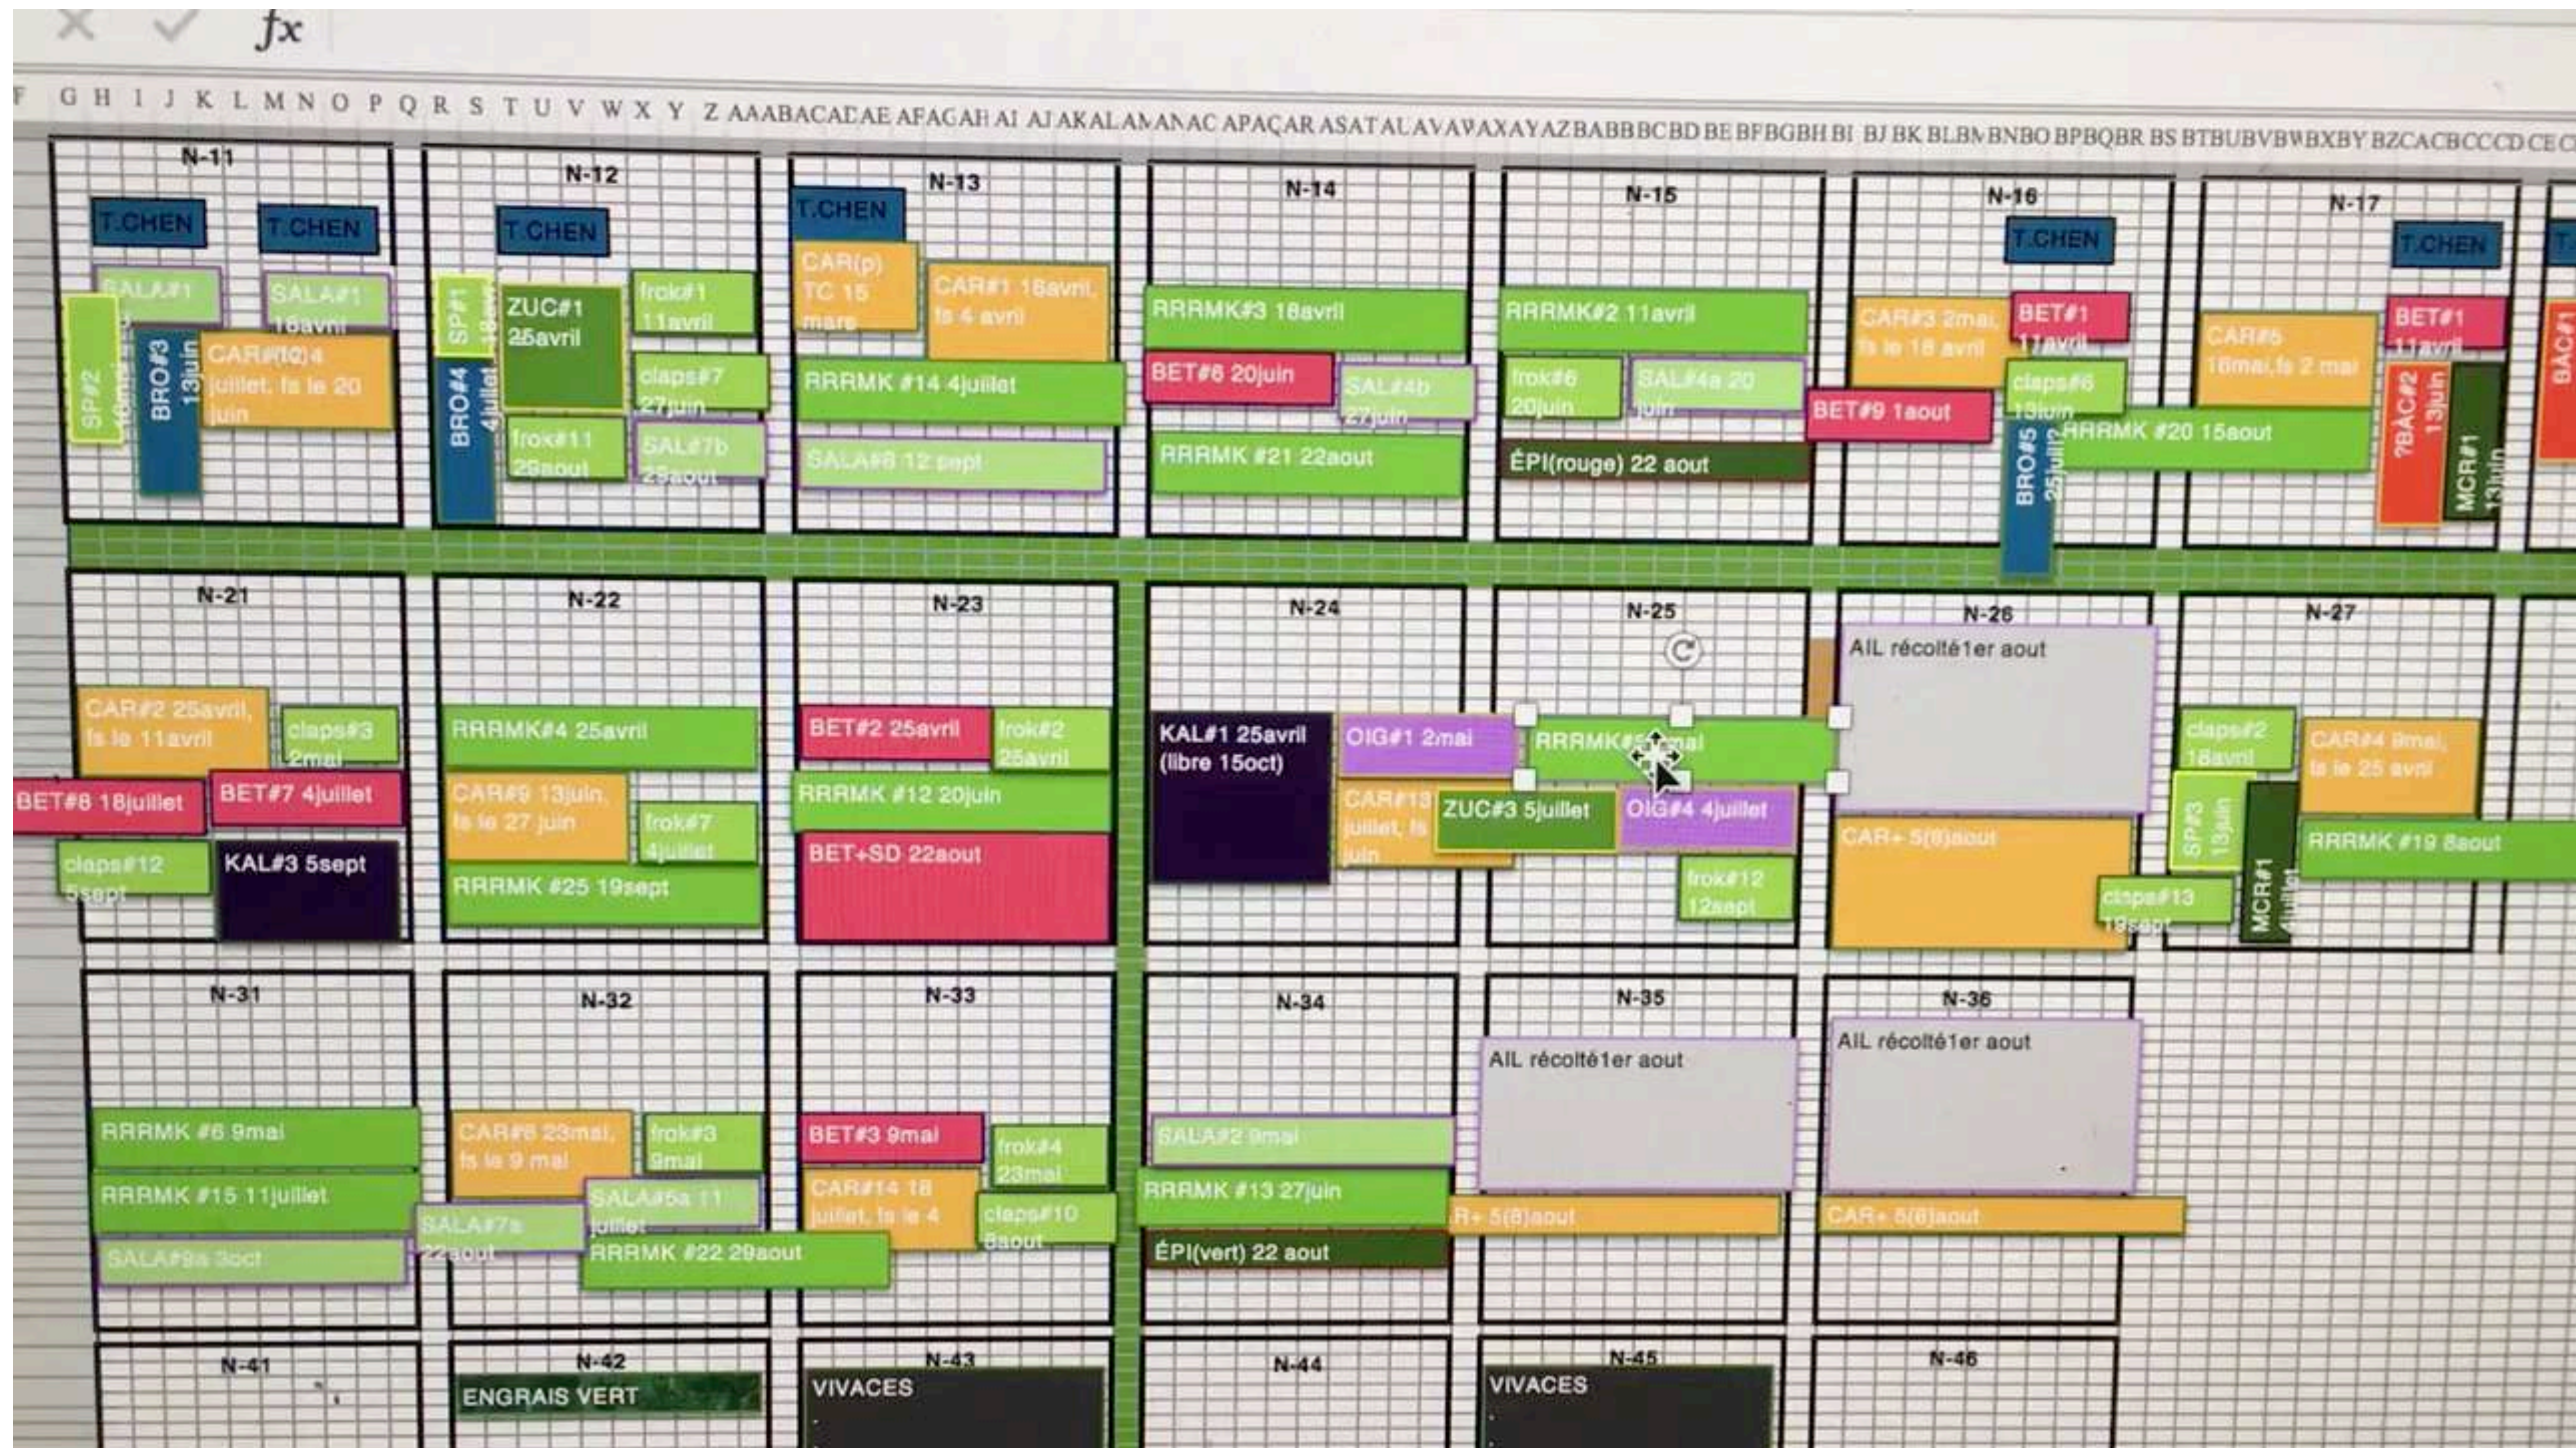

* "Days to maturity" refers to the number of days between the seeding and the first harvest. This expression is not synonymous with "days in the garden" (which I mention in the crop notes), as the figure for days to maturity includes the time spent in cell flats. For vegetables transplanted early in the spring or late in the fall, the days to maturity must be adjusted for slower plant growth.

** The weekly yields are approximate and take account of our intensive spacing on a bed 30 inches wide and 100 feet long. You will have to modify these numbers in proportion to the dimensions of your beds.

JANG 3X GANG SEEDER

- Takes 2 minutes to seed 1 row @ 100' bed. 6 rows will take you 12 minutes
- Using the Jang 3 X will take you 4 minutes. 1/3 on the time
- 8 minutes X 8 beds a week = shaving 1 hour per week X 30 weeks = 30 hours
- 30 hours at 14\$ = 420\$
- 525\$ VS 1280\$ = 780\$, 2 year payback
- Sold at Johnny's in US, Dubois.ag in Canada

OF LIFE

ADD-ON BONUSES

FREE ADD-ON COURSES

As a Masterclass student, you will also receive free access to related educational content from our collaborators and friends who are also teaching relevant skills for small farmers.

EXCLUSIVE DISCOUNTS AT TOOLS MANUFACTURERS

We have teamed up with leading tools companies to offer secret and exclusive discounts to our students. Enjoy 5% to 20% off tool and material purchases.

SPECIAL EVENT INVITES

Build community and meet your peers at conferences and live events with special invites exclusively for our students. Join us in this small farm revolution!

100% RISK-FREE MONEY BACK GUARANTEE

The Market Gardener's Masterclass comes with a 100% Money Back Guarantee. Our hope is that your farming and life is forever transformed with the skills you develop with this training. And, we also expect you to give your very best effort to implement the strategies. That's why in order to be eligible for our 60 Day Money Back Guarantee, you must tell us exactly how and why it did not work for you.

If you do the full coursework, don't feel that it worked for you and submit your request within 60 days of purchase, we'll promptly refund your course fee. To be clear, if you have not completed the lessons and do not include your honest assessment of what didn't work for you within the 60 day period, no refund will be issued.

SPECIAL INTRODUCTORY PRICING

Instead of our regular price of 2497\$, we are offering our very first cohort a one-time only discount of 1000\$ on the tuition.

Access to the course begins Jan 10th.
